

Chart 1: There is a significant correlation between lack of COVID restrictions and COVID death rates in 2021.

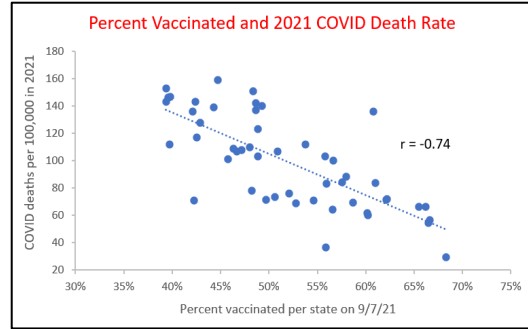

Chart 2: There is a very significant correlation between percent vaccinated and COVID death rates in 2021.

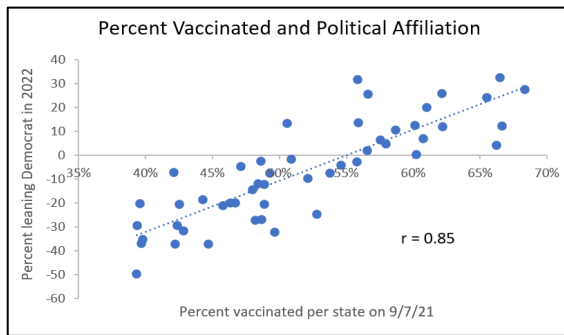

Chart 3: There is a very significant correlation between percent vaccinated in 2021 and political affiliation.

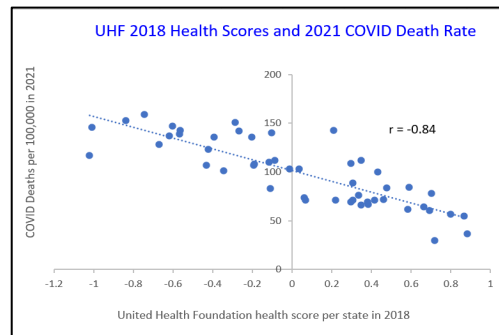

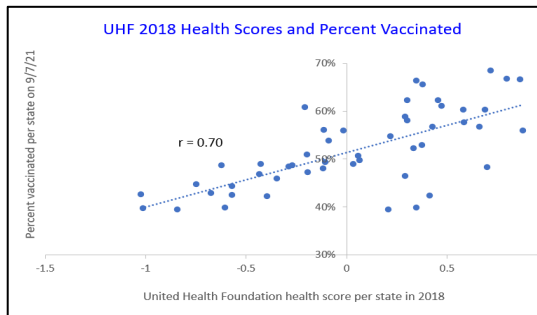

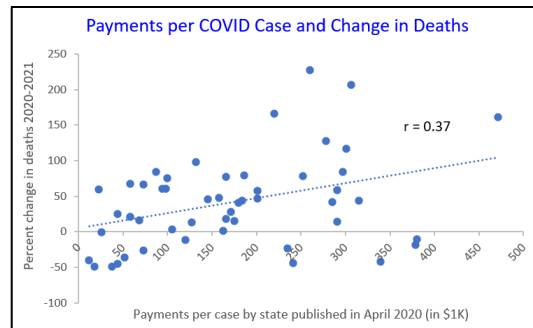

Chart 4: There is a very significant correlation between health scores in 2018 and COVID death rate in 2021. *Comorbidities played a major role in "COVID" mortality.*

There is a very significant correlation between health scores in 2018 and percent vaccinated in 2021. *This indicates health user bias in Chart 2.*

There is a marginally significant correlation between CARES payments per COVID patient in 2020 and percent change in COVID deaths from 2020 to 2021. *Did larger payments compel these states to inflate their COVID numbers in 2021?*
